Alphacare 841 Water Conditioner

Recommended to re-harden highly purified, ultra-soft water

February 2022

Product Description & Application

Water quality has a considerable impact on the ink split in the press and thus influences directly the print quality. In many case, reverse osmosis water is used to get a standardized zero point for fountain solution.

The result of this process is desalinated water that requires a re-hardening to be useful for offset printing. *Alphacare 841* is a concentrate to be added to the RO water for the fountain solution and dampening system.

Features & Benefits

- Additive on basis of Calcium to adjust the hardness of demineralized water;
- Efficacious and reliable hardener for demineralized water;
- Especially suited for alcohol-free or alcohol-reduced printing;

Use and product instruction

- Used at a dosage of 0.5%.
- Maintains a hardness of 10°dH.

Storage/Handling & Packaging

Storage and handling	<ul style="list-style-type: none">• Store at moderate temperatures (8 - 40°C).• The use of safety gloves is recommended.• Keep container tightly closed• Keep away from direct sun light
Shelf life	12 month from the date of manufacturing
Packing	20 litre can, 10 litre can, 5 litre can
Caution	avoid contact with skin and eyes
