

Alphacare 888 Ink drying accelerator

A special water fountain additive which improves the surface drying of ink

February 2022

Product Description

This Ink Drying Accelerator is a special water fountain additive which improves the surface drying of inks for sheetfed offset printing.

By speeding surface drying, “ink set-off” is reduced, jobs turn over faster, with less chance of smudging and streaking and there’s an overall reduction or elimination of the use of anti-set-off spray-powder.

The use of Ink Drying Accelerator can speed up production schedules, particularly on jobs where ink drying is a problem.

Properties and utilization:

- Compatible with all acid-based fountain solutions
- Causes an accelerated drying of ink
- Reduces smearing and set-off
- Accelerates job turnaround

Features

- The product is not combustible
- No volatile ingredients
- Slight odor

Technical data

Physical properties		Compatibility of inks		Compatibility of plates	
Dosage	0,5-2,0% max	Conventional inks	Yes	Thermal plates	all brands
PH-value	7 (+/- 1)	Metal inks	Yes	Violet plates	all brands
Density (20°C)	1.08 g/ml	UV-inks	Not applicable	Conventional plates	all brands
